Uncle Billy Beans, of the Goshen Ind. Democrat, in speaking about unhappy marriages, said:

Nine-tenths of the unhappy marriages are the result of green human nature being allowed to run at large in society pastures without voices on them. They marry and have children before they have mustaches. They are fathers to twins before they have 3 pairs of pants and the little girls they marry are old before they are out of their teens. Occasionally one of these godless marriages turns out all right, but it is a sheer case of luck. If there was a law against young goliaths sparring and maturing before they have cut their teeth, we suppose they would evade it in some way, but there ought to be a sentiment against it. It is time now for those bantams to think of minding a pullet when they have raised money enough to buy a bundle of feathers to build a henhouse. But they are a set who looks running, and they are afraid there is not going to be enough to go around, and then they begin to get their wings in real sprit and before they are aware of the sanctity of the marriage relation they are hitched for life, and before they own a cook stove of bedstead, they have to get up in the night and go after the doctor so frightened that they run themselves out of breath and above the doctor because he does not run too, and when the doctor gets there, there is not enough time in the house to wrap up a doll baby."

DO YOUR SHARE IN PREVENTING COSTLY FIRES

There is no poetry in a fire that destroys. There is no warmth or good cheer in a blazing house. Only misery and want and woe can echo from houses destroyed, from business houses wrecked, from savings ruined via the fire route.

And fires are the fruits of human acts of commission and omission. They do not start of their own accord. They must always have a human being for a partner.

This being the case, why not cultivate a little foresight? Why not keep your premises clear of trash or litter, of waste and such things that are excellent fire food?

When property charred and charred, a charred fire is a thing that makes a most excellent servant, contributing greatly to the comforts of man. But to keep fire a servant requires constant and unceasing vigil. While a good servant, it is a most exacting master.

Are you doing your full share toward preventing fire? If you are you merit the thanks of your neighbors. Every time a house is destroyed by your neighbors must stand their full part of the fire insurance you may collect.—S. W. English.

In order to introduce our Whalebone Suction, we offer a set of teeth which are the whitest and strongest set known—bite come off the set the first time, do not fall in the mouth while eating—until Jan. 31 we have decided to make this excellent \$10 set of teeth for \$4.

Have impression taken in morning and advise free. Established.
